Troxler Avenue

Despite a delay due to product availability and the extreme heat, this week the employees of Quality Saw & Seal are once again hard at work on Troxler Avenue.

This project will improve Troxler Avenue by eliminating the thumping. Workers are retrofitting the contraction joints with dowel bars, adding a quick drying grout that will withstand at least 5,000 psi, then doing a fine grinding on the pavement. Finally the pavement will be restriped and sealed.

The work is still expected to be completed well before the start of school. Please be aware of the workers in the area. The road will remain open at all times, but lane restrictions will be in place and may change from day to day as the project progresses.
